

Missouri Weekly Influenza Surveillance Report 2019-2020 Influenza Season¹

Week 46: November 10, 2019 – November 16, 2019

All data are preliminary and may change as more reports are received.

Summary:

- The estimated influenza activity in Missouri is Sporadic².
- A total of 126 laboratory-positive³ influenza cases (56 influenza A, 68 influenza B, and two untyped) were reported during Week 46. The season-to-date total of laboratory-positive influenza cases is 852 (50.3% influenza A, 49.0% influenza B, and 0.7% untyped). No laboratory-positive cases of influenza were reported by the Missouri State Public Health Laboratory (MSPHL) during Week 46. The percentage of respiratory specimens testing positive for influenza in Missouri laboratories reporting to the National Respiratory and Enteric Virus Surveillance System (NREVSS) increased slightly but remains low during Week 46 (Figure 6).
- Influenza-like illness (ILI) activity was below baseline the Missouri Outpatient ILI Surveillance Network (ILINet) and above baseline for the hospital emergency room visit chief complaint data reported through ESSENCE. The reported percentage of visits for ILI was 1.50% (Figure 5) and 2.37% (Figure 7) through ILINet and ESSENCE respectively.⁴ The ILI data from a small number of sites located in the Northwest Region of the state is currently unavailable in ESSENCE. Therefore, the ILI data for the Northwest Region should be interpreted with caution.
- No influenza-associated deaths have been reported in Missouri as of Week 46.⁵ During Week 45, 41 deaths involving Pneumonia and Influenza (P&I) were reported to the Bureau of Vital Records, resulting in a season-to-date total of 226 P&I associated deaths in Missouri.⁶
- No influenza or ILI-associated outbreaks or school closures have been reported in Missouri as of Week 46.
- Seasonal influenza activity in the United States increased during Week 45. National influenza surveillance information is prepared by CDC and is included in the weekly FluView report, which is available online at <http://www.cdc.gov/flu/weekly/fluactivitysurv.htm>.

¹The 2019-2020 influenza season begins CDC Week 40 (week ending October 5, 2019) and ends CDC Week 39 (week ending September 26, 2020).

²Sporadic is defined as: Small numbers of laboratory-confirmed influenza cases or a single laboratory-confirmed influenza outbreak has been reported, but there is no increase in cases of ILI.

³Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.

⁴Influenza-like illness (ILI) is defined by ILINet as fever (temperature of 100°F [37.8°C] or greater) and a cough and/or a sore throat without a known cause other than influenza. ILI is defined by ESSENCE as Emergency Department chief complaints for Influenza or (FeverPlus and (Cough or SoreThroat) and not NonILIFevers).

⁵All influenza-associated deaths became reportable in Missouri in 2016.

⁶The P&I data are available one week later. The P&I data for the CDC Week provided is the most current data available.

Data Figures

Figure 1. Number of Laboratory-positive[†] Influenza Cases by Influenza Type, Missouri, CDC Week 46 (November 10, 2019 – November 16, 2019)*

Influenza Type	Week 44	Week 45	Week 46	2019-2020* Season-to-Date
Influenza A	68	71	56	429
Influenza B	70	63	68	417
Influenza Unknown Or Untyped	1	0	2	6
Total	139	134	126	852

[†]Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.

*Influenza season begins week ending October 5, 2019 (CDC Week 40) Data Source: Missouri Health Information Surveillance System (WebSurv).

Figure 2. Number of Laboratory-positive[†] Influenza Cases and Case Rates by Age Group, Missouri, CDC Week 46 (November 10, 2019 – November 16, 2019)*[‡]

Age Group	Week 46 Cases	Week 46 Rate [‡]	2019-2020* Season-to-Date	2019-2020* Season-to-Date Rate [‡]
00-04	23	6.14	171	45.68
05-24	49	3.05	269	16.77
25-49	24	1.25	185	9.67
50-64	22	1.78	128	10.35
65+	8	0.84	99	10.37
Total	126	2.07	852	14.00

[†]Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.

*Influenza season begins week ending October 5, 2019 (CDC Week 40) Data Source: Missouri Health Information Surveillance System (WebSurv)

[‡]Incidence Rate per 100,000 population

Figure 3. Number of Laboratory-positive[†] Influenza Cases and Case Rates by Region, Missouri, CDC Week 46 (November 10, 2019 – November 16, 2019)^{*,‡}

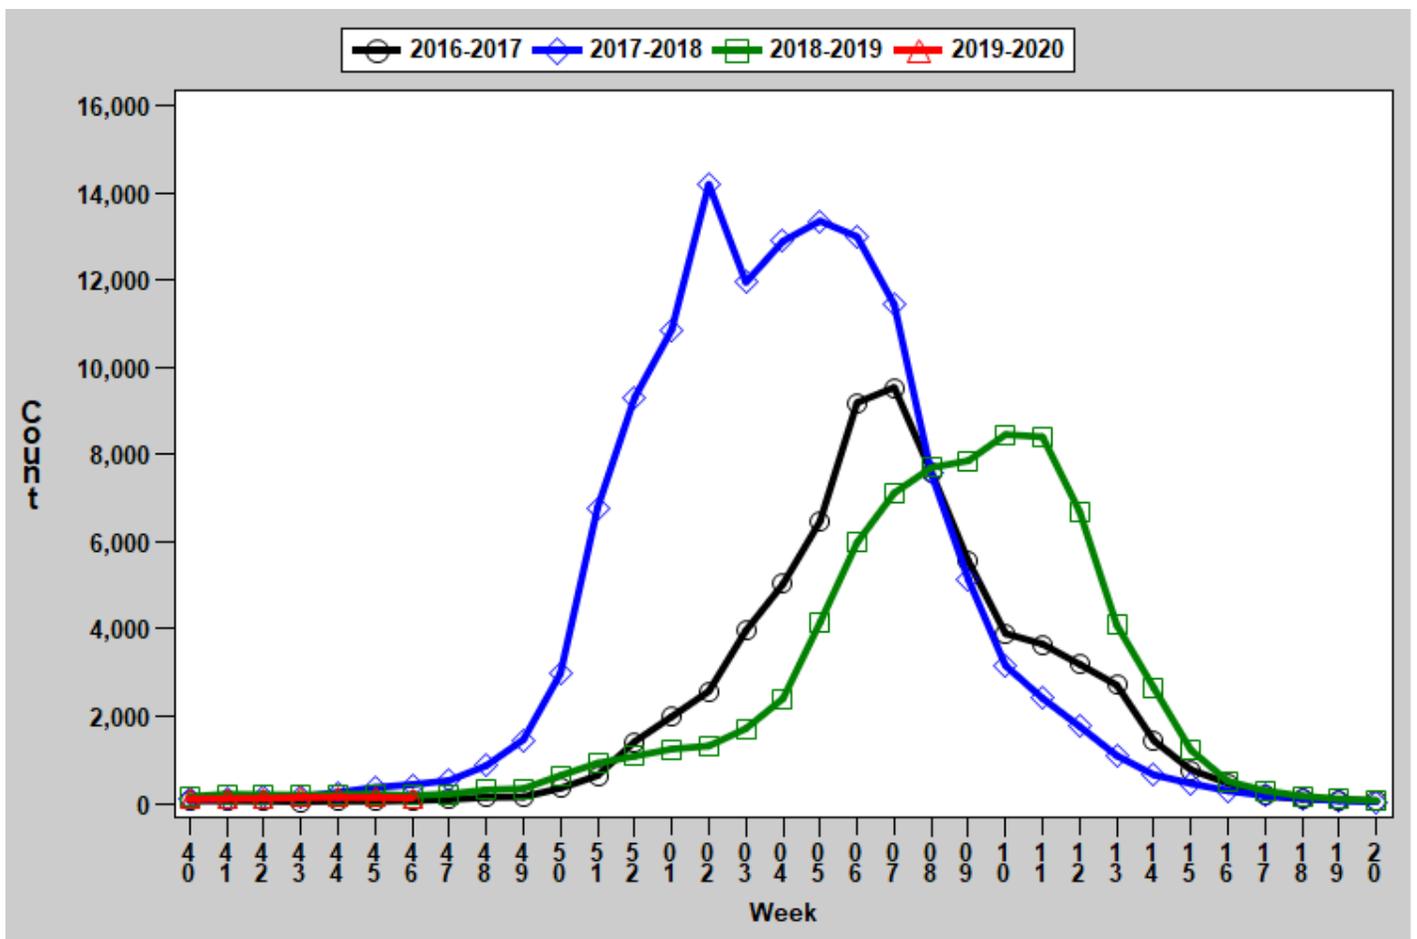

Region	Week 46 Cases	Week 46 Rate [‡]	2019-2020* Season-to-Date	2019-2020* Season-to-Date Rate [‡]
Central	18	2.66	135	19.94
Eastern	34	1.50	237	10.46
Northwest	42	2.63	119	7.45
Southeast	16	3.39	190	40.28
Southwest	16	1.49	171	15.96
Total	126	2.07	852	14.00

[†]Laboratory-positive influenza includes the following test methods: rapid influenza diagnostic tests (antigen), reverse transcriptase polymerase chain reaction (RT-PCR) and other molecular assays, immunofluorescence antibody staining (Direct (DFA) or Indirect (IFA)), or viral culture.

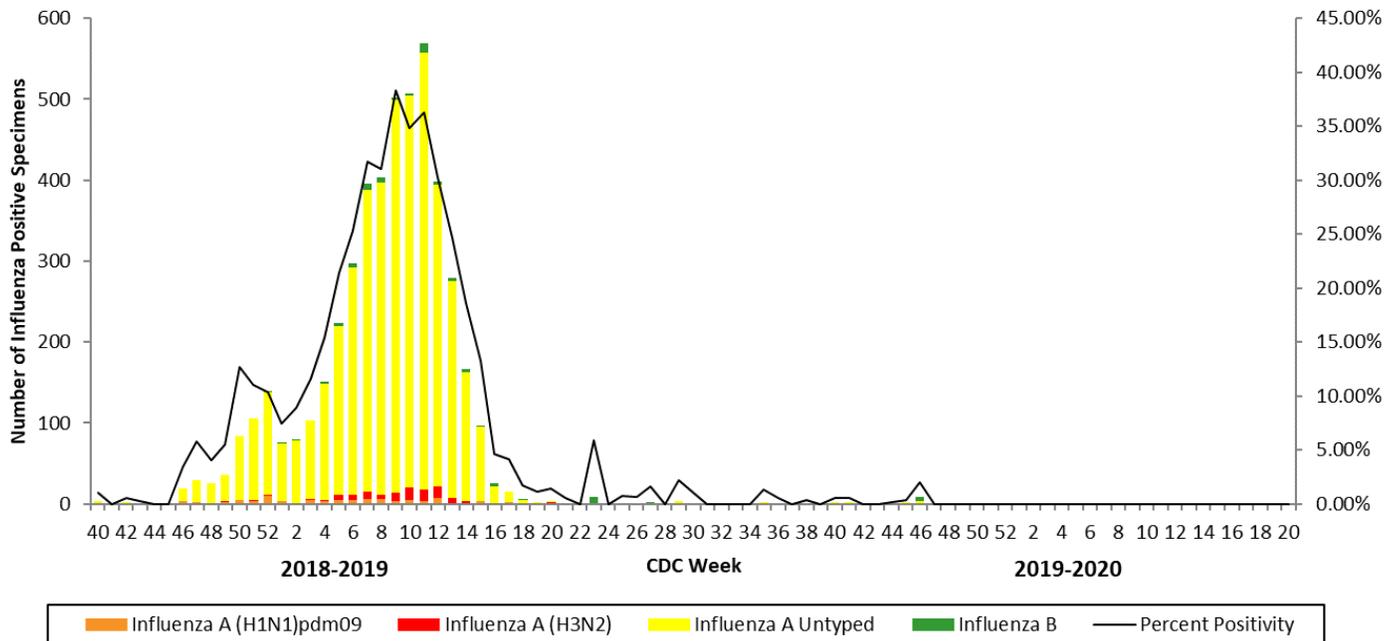

Figure 5. Percentage of Outpatient Visits for Influenza-like Illness (ILI), Missouri Outpatient ILI Surveillance Network (ILINet) 2016-2020*†

*The ILINet Region 7 (MO, IA, KS, NE) baseline is the mean percentage of patient visits for ILI during non-influenza weeks for the previous three seasons, plus two standard deviations. A non-influenza week is defined as periods of two or more consecutive weeks in which each week accounted for less than 2% of the season's total number of specimens that tested positive for influenza. Data Source: U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet), Centers for Disease Control and Prevention (CDC).
